Every single article by OGO has an original and minimalist design, and most importantly, they have been created to be practical and useful. ENJOYING THE SUN

OGO is a brand with roots that comes from islands, firmly attached to the wildest of natures, to its colours, to the immensity of the sea, to the salt, to the warm sand, the purest breeze, and the sun's eternal embrace. The mild temperatures have marked the serene and peaceful character of our products, so that you can #enjoy with us in the open air, and everything this can bring you: pleasant days spent at crystal-blue beaches, long hours by the pool, laughter and secrets under the stars...

We know that we all love moments like these, most of them which cannot be improved. But what if they were? OGO, in some way, manages this to make your memories and experiences in the open air even better.

OGO es una marca de raíces isleñas, ligada de manera inquebrantable a la naturaleza más viva, a sus colores, a la inmensidad del mar, a la sal, la arena cálida, la brisa más pura y el eterno abrazo del sol. Las templadas temperaturas han marcado el carácter sereno y sosegado de nuestros productos, para que #disfrutes con nosotros del aire libre y de todo lo que éste puede aportar: días apacibles en playas bañadas por el mar azul, largas horas junto a piscinas infinitas, risas y confidencias bajo las estrellas... Sabemos que a todos nos encantan esos momentos, muchas veces inmejorables. Pero, ¿y si lo fueran? OGO, de alguna manera, surge así: para hacer de tus recuerdos y experiencias al aire libre algo todavía mejor.

Fabrics Telas

Our fabrics 3D Nets and 3D Agora are three-dimensional. Its special characteristics, 100% breathable, 100% drainable, combined with a filling of 100% polystyrene allow the product to be used on water.

Fabrics for the outdoors which are not three-dimensional are not to be used on water because they lack drainage.

Synthetic leather and outdoor tarpaulin are both waterproof and can be used outdoors. However, avoid leaving the product for an extended amount of time in a puddle of water in case of heavy rain.

IN fabrics cannot be used outdoors. It is not recommended to expose them to the sun for many hours behind windows, especially if the colours are very bright.

Los tejidos 3D Nets y 3D Ágora son tridimensionales. Sus especiales características, 100% transpirable y 100% drenable, combinadas con el relleno 100% poliestireno expandido permiten que el producto pueda ser utilizado en el agua.

Products Designed and Crafted Artisanally in Spain

The total measurements of the products by OGO which are shown in this document can vary between 5cm +/- depending on the typology of the product and the characteristics of the different fabrics.

 This sign indicates that the product combines three of the necessary characteristics to be used on water now and then (design, 3D fabric and 100% polystyrene filling). These are: Don-Out Collection; Starfish; Sit Pool 1 plaza; Bali; Maria; Big Bag.

All OGO products are delivered in plastic raffia cases to protects them during the shipping. We recommend not throwing them out, as they can be reused to put the product away.

Products made with fabrics that are not three-dimensional are filled with a mixture of polystyrene and foam. 3D fabrics are always filled with 100% polystyrene. However, if the client tells the factory that its use will only be indoors, the product will be filled with the aforementioned mixture.

 In case of contact with water, the product must be rinsed in order to get rid of traces of chlorine and salt to protect it from unnecessary damages.

 It is recommended to put away the furniture when dry if it is not going to be used in a long time. Use the case for this. The time it takes in order to dry can vary from 4-7 days depending on the climate and the fabric. We recommend hanging it up so that the air can run across the surface.

It is recommended not to eat on the products. OGO takes special care of the design and thus the majority of its creations are not susceptible of modification in order to make them double-case. In case the products is stained, the stain must be cleaned immediately and with neutral products. Consult the card of the fabric.

 El peso de los artículos aumenta considerablemente en caso de entrar en contacto con el agua, por lo que después de su uso deben ser retirados cuidadosamente, e incluso, dependiendo de las medidas del producto, pueden ser necesarias dos o más personas para dicha acción.

 En caso de contacto con el agua, el producto debe ser enjuagado con el fin de retirar el cloro o salitre para protegerlo de deterioros innecesarios por uso extremadamente intensivo.

 Se recomienda guardar el mobiliario completamente seco si no va a ser utilizado en un largo periodo de tiempo, utilice su funda para tal fin. El tiempo de secado puede oscilar entre 4 a 7 días aproximadamente dependiendo de la climatología del momento y del tejido. Se aconseja tenderlo para que el aire corra por su superficie.

Se recomienda no comer sobre los productos; OGO cuida especialmente del diseño y por ello la mayoría de sus creaciones no son susceptibles de modificación con el fin de hacerles doble funda.
